

Job Title: HVAC Service Technician

Job Summary:

We are seeking a skilled and dependable HVAC Service Technician to install, maintain, and repair heating, air conditioning, and hydronic systems. The ideal candidate will have strong technical knowledge, problem-solving skills, and a customer-focused attitude. This role involves diagnosing issues, performing routine maintenance, and ensuring systems are operating efficiently and safely.

Key Responsibilities:

- Inspect and diagnose HVAC systems, including electrical and mechanical components.
- Perform routine maintenance, such as cleaning, adjusting, and repairing systems.
- Install HVAC equipment (e.g., furnaces, air conditioners, heat pumps, boilers, mini splits and ductwork).
- Handle refrigerant charging, recovery, and leak detection in accordance with EPA standards.
- Interpret wiring diagrams, and technical manuals.
- Communicate effectively with customers about service options, pricing, and system conditions.
- Complete service documentation and reports accurately.
- Adhere to all local and national HVAC codes, safety standards, and company policies.

Qualifications:

- High school diploma or equivalent; technical or trade school certification preferred.
- 2+ years of HVAC experience (preferred, will train if necessary).
- Valid EPA Section 608 Certification.
- Valid driver's license and clean driving record.
- Ability to use HVAC tools and diagnostic equipment.
- Strong understanding of HVAC systems, controls, and safety practices.
- Excellent troubleshooting and communication skills.

Work Conditions:

- May require working in confined spaces, on rooftops, or in varying weather conditions.
- Must be able to lift up to 50 lbs and stand for extended periods.
- On-call availability for emergency repairs (as needed).
